THORNE

Thorne Quality and Top Products

Thorne is forging the path forward by confronting an issue held back by bad science and by achieving levels of quality once thought impossible.

Manufacturing the right way

We manufacture our own products to ensure complete supply chain transparency

We know that many other brands don't take the necessary steps to ensure their products meet the most rigorous standards. So, we do. We invest extensively to make sure we own every step of the manufacturing process. There are no shortcuts taken at Thorne. We invest extensively in clean, green manufacturing practices. We refuse to use magnesium stearate or any other unwanted ingredient that inhibits absorption.

Sourcing exceptional ingredients

We develop better standards for higher quality ingredients

Thorne cares deeply about where our ingredients come from. Our research and development team travels the world, sourcing exceptional ingredients, maintaining oversight of origin, and providing complete supply chain transparency. We partner only with suppliers whose practices emphasize quality, science, and responsibility. Better ingredients means better potency, absorption, and digestibility – and ultimately better health.

Four rounds of testing

We have two state-of-the-art, in-house laboratories that enable us to conduct four rounds of testing, while most of our competitors test only once or twice

1. Raw materials and components – we test every incoming raw material and component. At our in-house laboratory we screen for more than 760 possible contaminants.

2. In-process testing – this ensures that every ingredient in a product formula is identified, quantities are verified, and the entire batch is properly mixed.

3. Finished product testing – each lot is tested to ensure identity, potency, and purity have been maintained and that there has been no contamination.

4. Stability testing – we test every product for potency during and at the end of their shelf life to ensure label claims up to the expiration date.

Sustainable Thinking

Thorne believes the environment should never be compromised for the sake of business gain. At Thorne, doing our part to protect the environment and its resources goes hand-in-hand with our quality standards

1. Technologies – To make a game-changing impact on reducing our carbon footprint, we invested in R&D and produced a new technology to deliver supplements. Out of this effort we launched Effusio by Thorne – a revolutionary line of dissolvable supplement discs. Effusio products reimagine the way supplements are delivered and packaged – eliminating the reliance on plastic.

2. Ingredients – Protecting endangered botanical resources is how we source ingredients in a responsible way that is protective of our environment. We take pride in being a steward of the botanical ingredients we use in our products, and will not use endangered botanicals or sources.

3. Shipping – Paperless “pick, pack, and ship” has essentially eliminated our use of paper and ink toner when processing customer orders. From our shipping boxes to the paper, fill-air pillows, and padded packs inside them, nearly all of our shipping supplies are made from recycled materials.

Only the best for you, your patients, and the environment. Only Thorne.

Top Products – 2020

Advanced Nutrients

An advanced multi-vitamin/mineral formula to support healthy aging*

Advanced Nutrients provides additional antioxidant nutrients and botanicals for healthy aging and eye health support.*

Amino Complex

Promotes lean muscle mass and strength, and enhances energy production*

Amino Complex is a comprehensive blend of essential and branched-chain amino acids to enhance muscle strength and promote growth of lean muscle mass – in athletes, the elderly, or anyone needing to build muscle strength.* It is best taken after a workout to help trigger the recovery process.*It is available in berry or lemon-lime flavors and is NSF Certified for Sport®. Read about amino acids to kickstart your workout.*

Basic Prenatal

Designed to be gentle and effective for women who are trying to conceive, pregnant, or lactating*

Basic Prenatal is a comprehensive multi-vitamin/mineral supplement with well-absorbed, tissue-ready vitamins and minerals that reduce the risk of stomach upset. It contains none of the additives found in mainstream prenatal supplements.

Berberine-500

For metabolic, cardiovascular, and GI support*

Berberine, an important plant extract, demonstrates well-researched benefits for blood sugar support, maintenance of healthy lipid levels, insulin sensitivity, cardiac support, weight management, and microbial balance in the GI tract.* (Berberine is also available in 200-mg capsules)

EnteroMend®

A unique botanical and amino acid formula to help maintain a healthy intestinal tract*

EnteroMend maintains a healthy inflammatory response in the GI tract, soothes the GI tract's mucus membranes, and supports colonic permeability and bowel regularity.* It contains well-researched and highly-absorbable curcumin and Boswellia phytosomes. Read more about EnteroMend for intestinal health.*

FloraMend Prime Probiotic®

A proprietary, stable probiotic blend for everyday GI and weight management support*

FloraMend Prime Probiotic offers a wide variety of health benefits, including GI support, weight management, seasonal allergy support, and immune function.* It's a dairy-free product in an acid-resistant capsule that requires no refrigeration. Explore our other probiotic products.

Hemp Oil +

A synergistic blend of phytocannabinoids to balance the endocannabinoid system*

Hemp Oil + uses the purest hemp stalk oil possible – certified organic and legal in all 50 states – to help modulate the body's response to stress and fear, physical discomfort, GI distress, and more.* Learn more about our unique hemp product.

*These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure, or prevent any disease.

Magnesium Bisglycinate

A well-absorbed form of magnesium that promotes sleep and muscle relaxation*

Magnesium Bisglycinate is a well-tolerated, lightly sweetened powder. It provides cardiovascular, respiratory, muscle, and bone support, while supporting relaxation for stress relief and a restful sleep.* NSF Certified for Sport®. View our other magnesium products or share this video with your patients.

MediBolic®

A rice and pea protein-based nutritional supplement for weight management and metabolic syndrome support*

MediBolic is a protein-based nutritional supplement with added soluble fiber, a complete multi-vitamin/mineral complex, and additional unique botanicals and nutrients to support metabolism, including healthy blood sugar, fat burning, insulin sensitivity, and satiety.* Explore our Weight Management Bundle and Weight Management Program and Metabolic Syndrome Program guides.

MediClear-SGS™

A flavored rice and pea protein powder with nutrients to support detox programs and elimination diets*

MediClear-SGS is a protein supplement with a complete multi-vitamin/mineral profile, additional detoxification cofactors, flavonoid phytosomes that support a healthy inflammatory response, and sulforaphane glucosinolate (SGS) for additional antioxidant and liver support.* View our entire MediClear suite. Read or download our 10-Day Detox and 21-day Detox and Allergy Elimination guides.

Memoractiv™

A nootropic for cognitive function and mental focus*

Memoractiv is a unique formula to support productivity, creativity, and mental focus, while promoting a feeling of well-being and helping the eyes filter light from blue screens.* More than a nootropic* – learn more about it.

Meriva 500-SF

Well-absorbed curcumin for support of a healthy inflammatory response throughout the body*

Meriva 500-SF helps maintain a healthy inflammatory response in the joints, muscles, GI tract, liver, eyes, and more.* Meriva® is the most clinically studied curcumin on the market with 29-times greater absorption than ordinary curcumin.* Explore our entire Meriva suite. Read more about Meriva here.

Methyl-Guard Plus®

Supports heart, blood vessel, brain, and bone health by enhancing healthy methylation*

Methyl-Guard Plus provides 5-MTHF (active folate); the active, tissue-ready forms of vitamins B2, B6, and B12; and betaine (trimethylglycine – an important methyl donor) to support healthy methylation for cardiovascular, cognitive, nerve, and bone health.* Explore our methylation suite or our Take 5 Daily Magazine articles on methylation.

Multi-Vitamin Elite

Two multi-vitamin / mineral formulas – for A.M. and P.M. – that support high performance nutrition*

Multi-Vitamin Elite provides highly bioavailable nutrients for athletes and others.* The A.M. formula contains additional botanical extracts to promote energy production, while the P.M. formula enhances rest and recovery.* NSF Certified for Sport®. Read about a study on benefits of Multi-Vitamin Elite P.M. for restful sleep.*

ResveraCel®

Support for energy production and healthy aging*

ResveraCel combines nicotinamide riboside with resveratrol and cofactors to support healthy aging.* It provides support for metabolic syndrome and increases cellular energy production.* Read more about ResveraCel for healthy aging.*
